DAY 01

Part I. 어법 어휘 구분

1. Contrasting (that image with a husky on a hot summer day in Southern California) as it is forced to walk slowly beside its human caretaker.¹⁾

→ 동사가 없기 때문에 명령문.

2. In fact, the Ancient Woodland Inventory of Scotland still depends on them today, and the techniques Roy (pioneered) [are / to be] directly linked to the creation of the Ordnance Survey, one of the largest map-making companies in the world.²⁾

techniques의 동사가 없기에 are.

3. The end of two World Wars and the Great Depression freed people in the industrialized countries to be concerned about matters other than personal security and the necessities of life.³⁾ O

→ 목적어가 없기에..
주동태

4. Theoretical perspectives from existential psychology suggest that accepting personal vulnerabilities, facing death, and experiencing the potential reality of our own death leads to a process of transformation including fundamental values in the ways in which we experience our sense of self.⁴⁾ O

⊕ 완전한 절

5. If it were not the case that humans share an ancestor with every other species on the planet, there would be no value in performing any form of comparative analysis.⁵⁾ O

→ that ⊕ 완전한 절

6. Examples of secondary prevention are plentiful in the United States because of the number of people with chronic conditions, (including high blood pressure or high blood cholesterol).⁶⁾ O

because + S + V
because of + N

DAY 01

Part I. 어법 어휘 구문

7. Many social scientists believe that there are just too many controllable variables in almost any situation to prove that particular ads actually work.⁷⁾

통제할 수 없는 변수가 너무 많다. 특정 광고의 효과 입증 X.

8. Early modern revolutions in knowledge about the heavens played a pivotal role in the emergence of science-based technological civilization. And for astronomy, as with so many domains of human life, the rise of this civilization has been revolutionary.⁸⁾

초기 현대 혁명들은 중심이 되는 역할로 played 함.

과학 기반 기술 문명의 등장에

9. In spite of these criticisms, however, those preparing or funding ads believe that advertising works - and they are the ones making decisions to spend millions of dollars to promote products and services.⁹⁾

believe that S+V.

10. Understanding the factors (that can cause a team to fail) underpins the development of effective strategies to make sure that this failure is not repeated in the future.¹⁰⁾

확실하게 하다

실패가 미래에 반복되지 X.

되풀이하다.

11. It seems that there is a sort of hangover effect when we switch between tasks. That is, returning our attention to a task isn't instant; it takes us a while to get going again.¹¹⁾

12. And for astronomy, as with so many domains of human life, the rise of this civilization has been trivial. Among the modern natural sciences, astronomy has no rival in terms of the magnitude (or ultimate significance of its discoveries).¹²⁾

하찮은

현대 과학 → 엄청난 발견의 중요성!

↳ revolutionary (변혁적인)

Whenever there is an area of the brain with underactivation, there is usually overactivation in other regions. The term for this is compensation. For example, when a blind individual does something that should involve sight, there is underactivation in regions of the brain involved in vision and overactivation in the areas governing the other senses. This same process of compensation is present with the poor reader. The reduction in the parietal and occipital lobes (two regions which play a significant role in the reading process) is accompanied by increased activation in the left prefrontal area. Compensation (related to reading can _____ because it alters the natural reading progression that has evolved since the beginning of reading. Established pathways are (usually) the most efficient in accomplishing a task. Consider someone who suffers a stroke and loses specific physical movements. If the regions of the brain responsible for those actions cannot be repaired, the brain will seek alternative pathways to restore the physical motion. However, even if restored, it is unlikely that the process will be as efficient as the procedure that has evolved over millions of years of brain evolution.

*parietal lobe 두정엽 **occipital lobe 후두엽
***prefrontal 전전두엽의

- ① work well ② need strategy ③ be harmful
④ be effective ⑤ pay off

29. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Sometimes when we become anxious about life and frightened for no reason at all, it is the fear that is protecting us. The fear is connected to our hidden memory of pain and is a means of safeguarding us. Fear is a greater ① challenge than anxiety because it is what most of us habitually try to run away from or avoid feeling. Consequently, we develop another brain reaction to try to halt our fears. This reaction may result in us adopting ② diverse techniques to avoid being hurt. These techniques could be to resist, compromise, use aggression and even attack people, conform, hold back, speak too much, or not speak at all. We adopt such strategies as attempts to ③ overcome our fears. Unfortunately, such strategies serve only to ④ increase our fears and we end up achieving the opposite. Life becomes a constant battle of running away from fear, which results in even more fear, of course, and we ⑤ remove more fears in the process. The more we run, the stronger the fear; if we fight the fear, it gets even stronger.

두려움을 극복하려고 전략을 통해 더 큰 두려움을 불러일으킨다.

→ 도망치는 과정에서 두려움이 새롭게 커지는 맥락

Mark Sozial was rejected by the International Finance Corporation (IFC), the investment banking arm of the World Bank, for a job in Cairo. After the rejection, he asked the IFC why he was turned down. He was told that a senior IFC official didn't think ① he had the required technical skills. So ② he wrote a letter to the official. "I realize that your team has made its decision regarding my candidacy, but I am hoping you will give me a chance should this position or another become available," Mark humbly wrote. But ③ he went further, and this is a key step: ④ he offered to take a test to demonstrate his technical skills. In other words, he was persistent, but not pushy. Within a couple of months, a problem developed with the other candidate. The IFC took Mark up on his offer of a test. ⑤ His results were great and exceeded the expectations of the skeptical senior IFC official. ⑥ He decided to hire Mark as an associate investment officer in Cairo.

*candidacy: 지원 임후보

[31~34] 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

31. Did you know that when ice cream sales rise, so do property crime rates? What do you think causes the two events to occur together? The explanation is that property crime peaks in the summer because of warmer weather, more people on vacations (leaving their homes vacant), teenagers out of school, and so on. It just happens that ice cream sales also peak in those months because of the weather. It is a case of a third variable causing both to occur. Or what if there were a positive correlation between sales of cigarette lighters and the incidence of cancer? The suspect might well turn out to be the omitted variable (the so-called "smoking gun"): the cigarette. Or what if research revealed that parents who bought parenting books were "better" parents? Does that prove the books work? Or is it possible that people who would buy books on parenting tend to be "better" parents? That is, it might be about the parents, not the book. _____ is tricky stuff. Be careful. [3점]

① Grouping

② Prejudice

③ Evaluation

④ Causality

⑤ Judgment

아이스크림 판매 증가 & 재산 범죄율 증가

당해 라이더가 판매한 양의 변동

→ 다른 변인 때문

32. Not all daydreams are equally effective at inspiring useful new ideas. In his experiments, Professor Jonathan Schooler distinguishes between two types of daydreaming. The first type occurs when people notice they are daydreaming only when prodded by the researcher. Although they've been told to press a button as soon as their minds start to wander, these people fail to press the button. The second type of daydreaming occurs when people catch themselves during the experiment. They notice they're daydreaming on their own. According to Schooler's data, individuals who are unaware that their minds have started wandering don't exhibit increased creativity. The point is that it is not enough to just daydream. Letting your mind drift off is the easy part. The hard part is _____. Even when you start to daydream, you must be able to interrupt yourself and notice a creative thought. [3점]

* prod: (손가락이나 보폭한 것으로) 자극하다

① maintaining awareness

② holding on to new ideas

③ sharing your state of mind

④ concentrating on what you see

⑤ keeping your imagination inactive

37.

There is no question that self-interest is a powerful force that motivates people to produce goods and services. But self-interest can include mercy. Think of the late Mother Teresa, who spent her life caring for others.

- (A) That is, self-interest to an economist is not a narrow monetary self-interest. The enormous amount of money and time donated to victims of Hurricane Katrina is an example of self-interest too — the self-interest was to help others in need.
- (B) One could say that her work was in her self-interest, but who would consider her actions selfish? Similarly, workers may be pursuing self-interest when they choose to work harder and longer to increase their charitable giving or save for their children's education.
- (C) However, our charitable actions for others are influenced by cost. We would predict that most people would be more charitable when the tax deductions are greater or that you may be more likely to offer a friend a ride to the airport when the freeway was less congested. In short, the lower the cost of helping others, the more help we can expect to be offered. [3점]

① (A) - (C) - (B)

② (B) - (A) - (C)

③ (B) - (C) - (A)

④ (C) - (A) - (B)

⑤ (C) - (B) - (A)

[38~39] 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오

38.

Contingency, of course, disagrees with other potential ways of explaining human behavior in the past.

Historians are concerned with *contingency* — the free will of humans to shape their own destinies. As historian David Hackett Fischer notes, people's choices matter. (①) It is the historian's task to explain the way people are driven to break free from their circumstances and the social and cultural forces that hold them in place. (②) History is thus told as a narrative — an often exciting and heroic one — of individual choices made by humans through time. (③) Fatalism and determinism are philosophical or religious systems that teach that human behavior is controlled by forces — fate or the order of the universe — that are outside the control of humans. (④) Actually it is undeniable that we are all products of the macro-level cultural or structural contexts that have shaped the world into which we have been born. (⑤) Any proponent of contingency would accept that, but in the end historians are in the business of explaining why people — as active human agents — have behaved in the past in the way that they did. [3점]

39.

Where we err, however, is in estimating the *duration* of the positive or negative feelings that such events evoke.

Many of our intuitive theories about the impact of events on our emotional lives are mistaken. However, sometimes they are mistaken in a rather special way. (①) We often hit the nail on the head when it comes to predicting the type of impact an event will have on us and the intensity of that impact. (②) For example, we may correctly predict that winning the lottery would thrill us more than locating a long-lost sock, or that the loss of a limb would horrify us more than a run in our nylons. (③) Research shows, for example, that the thrill of winning the lottery, and the horror of acquiring a physical handicap, both diminish more quickly than expected. (④) Indeed, after only a few months, people who have experienced either one or the other are barely distinguishable in terms of their overall happiness. (⑤) In technical jargon, our *affective forecasts* exhibit a *durability bias*, for both positive and negative events.

40.

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Members of groups using a space daily may perceive that particular messages are being presented, but visitors may not "hear" the same ones. Think about an open office workplace design. If a corporation has a history of encouraging and rewarding group work, that open office design can be seen by the people using it as a wonderful tool that helps them reach important objectives. It communicates to them that their employer respects their contribution to the firm's success. People working at a company that rewards individual work might see the same open-plan workspace as a symbol of how little their employer respects them and their contribution to the success of the firm. Visitors to either space might feel that the executives of the firms involved do not trust their employees and feel they need to continually supervise them.

The office workplace design performs the function of conveying the work (A) of an organization to employees, the contents of which might be (B) by outsiders.

- (A) (B)
- ① load appreciated
- ② load misunderstood
- ③ division imitated
- ④ atmosphere appreciated
- ⑤ atmosphere misunderstood

이러한 직장 환경의 디자인은 직원들에게는 긍정적인 메시지를 전달하지만, 방문객에게는 그렇지 않다. 직원들은 직장의 분위기를 긍정적으로 인식하지만, 방문객들은 직장의 분위기를 부정적으로 인식한다. 직원들은 직장의 분위기를 긍정적으로 인식하지만, 방문객들은 직장의 분위기를 부정적으로 인식한다.

33. New technology tends to come from new ventures — startups. From the Founding Fathers in politics to the Royal Society in science to Fairchild Semiconductor's "traitorous eight" in business, small groups of people bound together by a sense of mission have changed the world for the better. The easiest explanation for this is negative: it's hard to develop new things in big organizations, and it's even harder to do it by yourself. Bureaucratic hierarchies move slowly, and entrenched interests shy away from risk. In the most dysfunctional organizations, signaling that work is being done becomes a better strategy for career advancement than actually doing work. At the other extreme, a lone genius might create a classic work of art or literature, but he could never create an entire industry. Startups operate on the principle that you need to work with other people to get stuff done, but you also need to _____ . [3점]

* entrenched: 굳어진

- ① stay small enough so that you actually can
 ② give yourself challenges as often as possible
 ③ outperform rival businesses in other countries
 ④ employ the efficient system of big enterprises
 ⑤ control the organization with consistent policies

34. If you want to use the inclined plane to help you move an object (and who wouldn't?), then you have to move the object over a longer distance to get to the desired height than if you had started from directly below and moved upward. This is probably already clear to you from a lifetime of stair climbing. Consider all the stairs you climb compared to the actual height you reach from where you started. This height is always less than the distance you climbed in stairs. In other words, _____ to reach the intended height. Now, if we were to pass on the stairs altogether and simply climb straight up to your destination (from directly below it), it would be a shorter climb for sure, but the needed force to do so would be greater. Therefore, we have stairs in our homes rather than ladders. [3점]

* inclined plane: (경)사면

- ① more distance in stairs is traded for less force
 ② a ladder should be positioned at a steep angle
 ③ the distance needs to be measured precisely
 ④ an object's weight has to be reduced
 ⑤ slopes are often preferred to stairs

35. 다음 글에서 전체 흐름과 관계 없는 문장은?

The first commercial train service began operating between Liverpool and Manchester in 1830. Ten years later, the first train timetable was issued. The trains were much faster than the old carriages, so the peculiar differences in local hours became a severe nuisance. ① In 1847, British train companies put their heads together and agreed that henceforth all train timetables would be adjusted to Greenwich Observatory time, rather than the local times of Liverpool, Manchester, or Glasgow. ② More and more institutions followed the lead of the train companies. ③ Railways faced infrastructure-related challenges such as those related to stations, tracks, and other facilities. ④ Finally, in 1880, the British government took the unprecedented step of legislating that all timetables in Britain must follow Greenwich. ⑤ For the first time in history, a country adopted a national time and obliged its population to live according to an artificial clock rather than local ones or sunrise-to-sunset cycles.

* nuisance: 골칫거리

[36~37] 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

36.

You know that forks don't fly off to the Moon and that neither apples nor anything else on Earth cause the Sun to crash down on us.

- (A) The Earth has more mass than tables, trees, or apples, so almost everything in the world is pulled towards the Earth. That's why apples fall from trees. Now, you might know that the Sun is much bigger than Earth and has much more mass.
 (B) The reason these things don't happen is that the strength of gravity's pull depends on two things. The first is the mass of the object. The apple is very small, and doesn't have much mass, so its pull on the Sun is absolutely tiny, certainly much smaller than the pull of all the planets.
 (C) So why don't apples fly off towards the Sun? The reason is that the pull of gravity also depends on the distance to the object doing the pulling. Although the Sun has much more mass than the Earth, we are much closer to the Earth, so we feel its gravity more. [3점]

- ① (A) - (C) - (B) ② (B) - (A) - (C)
 ③ (B) - (C) - (A) ④ (C) - (A) - (B)
 ⑤ (C) - (B) - (A)

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? [3점]

Even the peasant family defines its own identity at the table. To live on one bread and one wine," that is, to share food, in medieval language an almost technical way of signifying that (one belongs to the same family). Even today in different dialectal expressions, the house is identified with the food that allows the domestic community to live there together: "Let's home" (*andiamo in casa*) in the traditional vocabulary of the Romagna region meant, "Let's go into the kitchen." On all social levels, sharing a table is the first sign of membership in a group. That might be the family but also a broader community — each brotherhood, guild or association asserts its own collective identity at the table. Every monastic community demonstrates its fellowship in the refectory where all are supposed to share the meal from which no one is temporarily excluded only the excommunicated — those who are tainted with some guilt.

* monastic: 수도원의 ** refectory: (특히 수도원의) 식당
*** excommunicate: 파문시키다

(A), (B), (C)의 각 네모 안에서 문맥에 맞는 낱말로 가장 적절한 것은?

In a movie of long ago, *Sleeper*, the protagonist wakes up from several-hundred-year sleep, understandably malnourished and oriented. His doctors are overheard planning a high-potency diet of sugar-laden foods for him. (A) shaking / nodding their heads at the "primitive" beliefs that the medical establishment held in the twenty-first century that vegetables were good for you. Now, they say, everyone knows that they cause cancer. While intended to be funny, that scene captures the dilemma you face when assessing information and research to guide your behavior. It is not enough to hear experts tell you things unless you (B) evaluate / reveal them for yourself. On the one hand, you should exhibit healthy skepticism toward ideas that conflict with what you think you already know, or what has been grounded in your experience. Yet, on the other hand, you should (C) force / forbid yourself to remain open to new ideas as that may actually be more accurate and useful.

* protagonist: 주인공 ** malnourished: 영양결핍의
*** high-potency: 고효능의

(A)	(B)	(C)
shaking	evaluate	force
shaking	reveal	forbid
shaking	evaluate	forbid
nodding	reveal	forbid

(A) 대체가 문에 들어갈 형식적인 믿음과 반대로 보장이 가득 든 증거를 통해 식당이라고 하는 것은 받아들이기 어려운 믿음에 부합하는 것이 옳다.

(B) 행동할 때 상황을 평가해야 하는데 아니면 전문가의 말을 믿어야 하는지 대체가에 비해 두 의미로 전문가의 말을 들을 것만으로는 충분치 않고 상황을 스스로 '평가해야' 한다는 맥락이 옳다.

(C) 자신의 생각과 경험을 믿고 전문가의 말에 의심할 여지는 것도 필요하지만, 새로운 생각에 열려 있지 않으면 해야 하는 내용.

(A) shaking / nodding (B) evaluate / reveal
흔한 고대어다 평가하다 드러내다

(C) force / forbid
-하게하다 -금지하다

1~34] 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

. It may seem odd to suggest that numbers are a human invention. After all, some might say, regardless of whether humans ever existed, there would still be predictable numbers in nature, be it eight (octopus legs), four (seasons), twenty-nine (days in a lunar cycle), and so on. Strictly speaking, however, these are simply regularly occurring quantities. Quantities and correspondences between quantities might be said to exist apart from the human mental experience. Octopus legs would occur in regular groups even if we were unable to perceive that regularity. Numbers, though, are the words and other symbolic representations we use to differentiate quantities. Much as color terms create clearer mental boundaries between colors along adjacent portions of the visible light spectrum, numbers create conceptual boundaries between quantities. Those boundaries may reflect a real division between quantities in the physical world, but these divisions are generally inaccessible to the human mind without numbers.

- luxury
- challenge
- distortion 대역
- ② invention
- ④ drawback 결점

The Arabic language doesn't have a single word for compromise, which some have said is the reason that Arabs seem to be unable to reach a compromise. Yet, the Arabic language does provide several ways to articulate the concept of compromise, the most common being an expression that translates in English to "we reached a middle ground." This example illustrates codability, which refers to the ease with which a language can express a thought. When a language has a convenient word for a concept, that concept is said to have high codability. Thus, the existence of the word compromise gives that idea high codability in English. When a concept requires more than a single word for its expression, it possesses lower codability. It is accurate, then, to say that the idea of compromise has lower codability in Arabic than in English. However, having a phrase rather than a single word to express an idea does not mean that the idea is nonexistent in a given culture, only that it

* articulate: 분명히 표현하다

- is less easily put into the language code
- can be changed over the course of time
- is manipulated in its language codability
- is deeply integrated into the cultural context
- has a single meaning but multiple interpretations

=> ②

수는 인간의 존재와 상관없이 자연적으로 존재한다고 생각된
수 있느냐 동물의 다리 개수, 달의 주기 등과 같은 것은
'자연스럽게 존재하는 양'이고, 인간은 그 양을 관찰하는
수라는 개념을 만들었다고 했으므로 '발명품'이 아니다.

odd

- odd : 이상한, 기괴한
- odds : 가능성, 확률, 배당률
- odd number : 홀수

even number : 짝수

⇒ 답 ①

아랍어에는 "타협"이라는 단어가 없다.

⇒ 부연가능성

어떤 개념을 표현할 때 한 단어 이상의 어휘가 필요한
때는 부연가능성이 낮다고 했으므로, 어떤 개념을 하나로
표현할 단어가 없어서 어휘를 부연하는 것은 부연가능성이
낮은 것이고, 그것은 개념이 없는 것이 아니라 그 나라의
언어로 표현하기가 쉽지 않다는 것을 추론할 수 있다.

do/des / did + 일반 ① 원형
